

## Multi Hazard Multi-jurisdiction Mitigation Project Worksheet

County: <b>Nelson</b>			
Jurisdiction:			
Contact Name: <b>Jay Haugen</b>	Contact Number: <b>701-259-2553</b>	Contact Email: <b>jhaugen@michigannnd.com</b>	
Project Location:		City: <b>Michigan, ND</b>	
Street Address:			
or			
Latitude:		Longitude:	

Priority Ranking	<b>High</b>	Medium	Low	Undetermined
Project Feasibility				
Socially Acceptable	<b>Yes</b>		No	
Technically Feasible	<b>Yes</b>		No	
Administratively Possible	<b>Yes</b>		No	
Politically Acceptable	<b>Yes</b>		No	
Legal	<b>Yes</b>		No	
Economically Feasible	<b>Yes</b>		No	
Environmentally Acceptable	<b>Yes</b>		No	

Recommended Mitigation Measure and Scope of Work: **Building of the Michigan Spillway to dewater the Lake Laretta basin and mitigate the flooding risk to the City of Michigan that currently exists. Currently Michigan drains into Lake Laretta but at levels slightly higher than current lake levels the water will move towards Michigan rather than away causing flooding, loss of public and private property along with city infrastructure including but not limited to the sewer and water system.**

How would Project Reduce Hazard: **The project would reduce the lake level and provide proper drainage from Michigan to the lake.**

Identification of Protected Species, Environmental, Historical, and/or Cultural Impact: **We have been working with the State Water Board and North Dakota Game and Fish regarding these concerns. All information is available upon request.**

Estimated Timeline: **This needs to be done as soon as possible.**

Estimated Cost: **Available from Nelson County Water Board**

	<b>Yes</b>	No
Cost/Benefit Completed:	<b>Yes</b>	No

Project Maintenance: **Required maintenance of spillway**
